WORKING PAPERS

25X1

Steering Group Agenda

21 November 1979

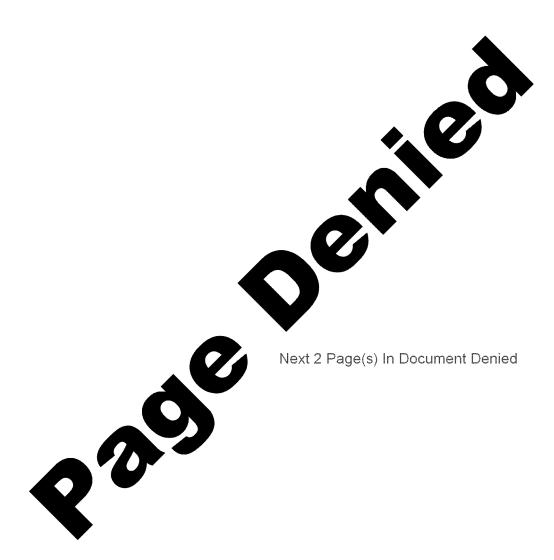

## Topics for Discussion:

- 1. Scope of Petroleum Analysis Project Work
- 2. Intelligence Production from the Project
  - -- Types of Reports
- 3. Research Priorities
  - --Soviet Fields
  - --PRC Fields
  - --Other
- 4. Fiscal Requirements
  - --Contract Funding
  - --Travel and Training
  - --Available Funds
  - --Supplementary Needs
- 5. Staffing Considerations
  - --ADP and Collateral Support by OER
  - --PI Resources

MORI/CDF Pages 2-4 and

## Approved For Release 2006/10/02 : CIA-RDP84T00316R000100090014-4

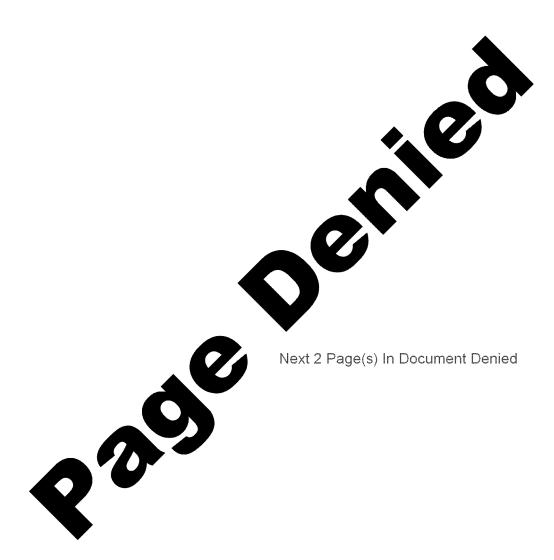

In view of the Chapman Study's assertion that has developed "a cadre of highly-trained analysts" with unique skills, and D/NFAC's stated desire "to maximize the limited analytical resources NFAC has invested . . . and to minimize NFAC's investment in new resources" by continued use of analysts already assigned to the project, OGCR believes that the continued assignment of key OER, OIA and NPIC analysts to principal roles on a priority basis is in the interest of the Agency -- at least until the 1981 review is completed. Supplemental analytical assistance, provided on an asneeded basis, may be necessary as the Project moves into analytical work on new areas of the world (e.g., the PRC). (C)

Alternative	3:		

25X1

Considerable retraining will still be required, and production will be slowed by an estimated 30% under the same logic as that contained in Alternative 2. This loss in production could, however, conceivably be reduced if there were some significant overlap in the personnel changes, or perhaps a personnel sharing arrangement to permit simultaneous training and production.
